Socio 200  Pre-seminar in Sociology

An advance introductory course which provides a deep review of the field, its methods, and scope of inquiry as a formal discipline.
Prerequisite: none
Credit Units: 3

Socio 201  History of Sociology

A study on the theoretical and methodological foundations of the modern sociology and the growth of this discipline from “lord” to “science”.
Prerequisite: none
Credit Units: 3

Institutions

Socio 210  Family and Kinship

Family types and kinship relations and their impact on larger social structures are taken up in this course, including a cross-cultural analysis of families of various societies.
Prerequisite: none
Credit Units: 3

Socio 211  Sociology of Religion

A scientific study of religion as a social fact, and as an institution which controls, modifies and validates human action. Major religious groups will be investigated to discern their universal and specific functions, and how the established beliefs embodied in them affect the economic, political and psychic orientation of people.
Prerequisite: none
Credit Units: 3

Socio 212  Medical Sociology

Ethical issues and social aspects of health, illness, and disease as well as relations between healers and the sick in various cultures are the subject matter for study in this course.
Prerequisite: none
Credit Units: 3

Socio 213  Political Sociology

A course on the analysis of philosophical and empirical works on the power and authority and the political institutions which give them meaning.
Prerequisite: none
Credit Units: 3
Socio 214  Sociology of Education

The sociocultural foundations of education and its effects on its individuals and societies will be explored here to be able to appreciate differences in learning, educational achievement and value system.
Prerequisite:  none
Credit Units:  3

Socio 215  Economy and Society

An analysis of economic life in pre-industrial and urbanizing societies, and an application of analytic models to account for activities relating to production and distribution of goods and services are the major subject areas in this course.
Prerequisite:  none
Credit Units:  3

Change and Deviance

Socio 220  Social Change

This course focuses on the theories of social change and empirical studies of the determinants and consequences of change. Experiences of underdeveloped and developed societies like Japan, the U.S. and many countries in Europe will be carefully examined.
Prerequisite:  none
Credit Units:  3

Socio 221  Deviant Behavior

A study on the review and analysis of abnormal behaviour, including other forms of deviancy which are not necessarily pathological, and social control used by society to enforced conformity to norms.
Prerequisite:  none
Credit Units:  3

Socio 222  Criminology and Penology

A study of correlates and typology of crime and its victims, and the mechanisms of legal sanctions to reduce the tide of criminality and anti-social acts.
Prerequisite:  none
Credit Units:  3

Socio 223  Social Problems

Breakdown of social relations and disturbance of the social order are the concerns of this course. Corollary to this, causes and consequences of major social problems will be explored and analyzed.
Prerequisite:  none
Credit Units:  3
Socio 224  Sociology of Revolution

This course will determine why men rebel, what changes to the society do they expect, and what means do they employ to reach their goals in a revolutionary way. Cases of rebellions in several types of the societies will be likewise studied.
Prerequisite: none
Credit Units: 3

Socio 225  Collective Behavior

A study of the theories regarding origins, internal process, dynamics and developments of short term and spontaneous group behavior in relatively unstructured social situations.
Prerequisite: none
Credit Units: 3

Socio 226  Sociology of Development

A course that deals with the causes and consequences of modernization and economic development. The patterns of change or reactions to it are also examined in changing and developing societies.
Prerequisite: none
Credit Units: 3

Socio 227  Futuristics

A study on the anticipation and forecast of what life might become in the future based on game there, stimulation, and other models using quantitative and qualitative methods.
Prerequisite: none
Credit Units: 3

Structure and Process

Socio 235  Social Stratification

Studies the critical and empirical basis of social stratification, the social means of mobility as well as some consequence of stratification on human behaviour and outlook.
Prerequisite: none
Credit Units: 3

Socio 236  Race and Ethnic Relations

This course is addressed to investigating in the effects and policy implications of social contracts when the people’s diverse racial and ethnic origins meet in a common locale.
Prerequisite: none
Credit Units: 3
Socio 237  Urban Sociology

This course deals with comparative studies of urban communities, nature and consequences of urbanization.
Prerequisite: none
Credit Units: 3

Socio 238  Rural Sociology

An analysis of village life and the world view as well as the microscopic view of the dominant social institutions in peasant societies and the changes that impinge on them.
Prerequisite: none
Credit Units: 3

Socio 239  Industrial Sociology

A course that studies on the psychosocial effects of industrialization vis-à-vis man-work, man-man, and man-time relations. Social relations among workers affecting productivity and management and employees relations are the major topics covered in this course.
Prerequisite: none
Credit Units: 3

Population and Ecology

Socio 240  Demography

An introductory course on the analysis of population structure and dynamics and their implications to the quality of life and human survival on earth.
Prerequisite: none
Credit Units: 3

Socio 241  Demographic Methods

A course focusing on the methods and techniques of estimating vital population processes and the statistical tools used in making demographic data analysis.
Prerequisite: none
Credit Units: 3

Socio 242  Population Dynamics

Answers to the question of how a population changes are sought in this course by examining migration, nasality, and mortality as revealed by studies the world over.
Prerequisite: none
Credit Units: 3
Socio 243  Family Planning and Fertility Control

This course deals with the analysis of the conceptual models used to explain fertility behaviour and the problems of family planning programs in the various cultures.
Prerequisite:  none
Credit Units:  3

Socio 244  Demography of Man, Power and Labour

A study of the composition, characteristics, participation, distribution and changes in the labour force and the factors that bring about such changes.
Prerequisite:  none
Credit Units:  3

Socio 245  Human Ecology

This course gives focus on human’s adaptation to various environmental and sociocultural settings, and his pattered responses to changes in these settings as a result of technological advancement, urbanization, and colonization.
Prerequisite:  none
Credit Units:  3

Socio 246  Seminar in Industrial Pollution

A course that concentrates on the investigation of various types of contaminants found in an industrial setting and the risk they impose on the health and life span of human beings. Organized reactions to and policies on pollution are likewise covered in this course.
Prerequisite:  none
Credit Units:  3

Social Psychology

Socio 250  Social Psychology

This course deals with the theory and research on the effect of social structures on an individual’s behaviour as well as the influence of personality of group behaviour.
Prerequisite:  none
Credit Units:  3

Socio 251  Small Group Processes

A course that studies the dynamics of attitude change in small groups and the patterns of interaction their members develop according to the contours of small group norms. These patterns may be contrary to ideal or established ways.
Prerequisite:  none
Credit Units:  3
**Socio 252  Culture and Personality**

A course that focuses on the analysis of the interplay between culture as a group phenomenon and personality as an individual attribute in different societies, with emphasis on the formation of recurrent traits, values, and peculiar ways of coping with varied situations.
Prerequisite:  none  
Credit Units:  3

**Socio 253  Seminar on Popular Culture**

A study of the resurgence of esoteric and novel fashions, crazes, and fads expressed in music and dance, art, and the relatively recent lures of society.
Prerequisite:  none  
Credit Units:  3

**Socio 254  Attitudes**

A study of the nature, formation, changes and measurement of attitudes.
Prerequisite:  none  
Credit Units:  3

**Socio 255  Motivations**

This course probes into the psychic forces of mankind which energize over behaviour, the types and ranges of motivations in industrial and urbanizing societies, as well as the approaches to measurement of motives.
Prerequisite:  none  
Credit Units:  3

---

**Work and Occupation**

**Socio 260  Sociology of Occupation**

A course that analyzes the meaning of attitudes to work and occupations, as well as the historical and ideological underpinnings of vocational behaviour, occupation prestige, and occupational choice.
Prerequisite:  none  
Credit Units:  3

**Socio 261  Entrepreneurship**

An examination of the environmental and socio-psychological factors in the rise of entrepreneurship and the acquisition of entrepreneurial personality.
Prerequisite:  none  
Credit Units:  3
Theory

**Socio 271**  Theory Construction

This course surveys and analyzes past and contemporary theories as revealed in the works of prominent sociologies and their conceptions of a model man or society.
Prerequisite: none  
Credit Units: 3

**Socio 270**  Sociological Theories

This course focuses on the mechanics of conceptualizing, developing, and testing research problems which are stated in the theoretical terms. Model building and construction of scales, and linking theory and data under a deductive or inductive system are also included in its coverage.
Prerequisite: none  
Credit Units: 3

**Socio 273**  Personality Theories

A course that concentrates on the major schools of thought explaining personality differences and principles of behaviour modification. Works of Lewis, Skinner, Dollar, From, McClelland and others will be analyzed.

**Socio 274**  Population Theories

Theories of population from Malthus to the leading contemporary demographers will be evaluated in this course with special attention to the debate on the relation between population, economics and related issues.
Prerequisite: none  
Credit Units: 3

Methods

**Socio 280**  Research Methods I

An introductory course on the scientific approach in conducting social research, zeroing in on the theoretical aspects of problem definition, hypothesis testing, development of suitable indicators, and the techniques of data collection and data reduction.
Prerequisite: Socio 288  
Credit Units: 3

**Socio 281**  Research Methods II

Research proposal writing and practicum.
Prerequisite: Socio 280  
Credit Units: 3
Socio 282  **Survey Methodologies and Design**

A course that familiarizes the student to the types of data collection using non-reactive methods and other appropriate techniques of community analysis under uncontrolled conditions.
Prerequisite: none
Credit Units: 3

Socio 283  **Field Methods**

The principles of assessing impacts of social and development projects through the use of social science research methods are the major focus of this course.
Prerequisite: none
Credit Units: 3

Seiko 284  **Evaluation Research**

An in-depth approach in conducting field investigations and application of research framework utilizing references other than the scientist’s point of view is what this course tackles.
Prerequisite: none
Credit Units: 3

Socio 285  **Ethnomethodology**

Mathematical models of social research and the ways of developing and applying them to right kinds of data are the contents of this course.
Prerequisite: none
Credit Units: 3

Socio 286  **Quantitative Sociology**

A programmable introduction to the procedures and techniques of data analysis using computers and programmable calculators.
Prerequisite: none
Credit Units: 3

Socio 287  **Data Processing**

A study on the basic concepts of statistics and probability with emphasis on the analysis of social science data using statistical tools and techniques.
Prerequisite: none
Credit Units: 3
Socio 288*  Advanced Statistics

A course concentrating on the principles of statistical tests and inferences using parametric and non-parametric statistics.
Prerequisite: none
Credit Units: 3

Social Report

Socio 290  Directed Readings/Research (3-6 units)

Under the close supervision of a faculty, students conduct an independent research on topics of special interest to them to clarify certain issues or prepare themselves for the writing of a research proposal. This course may be repeated for credits.

Socio 298  Special Problem (3 units)

Prerequisite: All core and other required courses.

Socio 299  Masteral Thesis (6 units)

Prerequisite: All core and other required courses.
Credit Units: 6

*Required core courses.
